NOTES ON DRAFT #2, dated 9 DECEMBER 1975:  
ORGANIZATION AND MANAGEMENT OF THE FOREIGN  
INTELLIGENCE COMMUNITY

Page

- 2 Parts of the Directorate of Science and Technology are involved as collectors.
- 3 USIB's role in advising the DCI on National Intelligence Estimates and offering departmental dissents to the DCI's Estimates should be specifically mentioned.
- 4 Is the statement about final resources and line control over the NRO accurate?
- 7 "Production constitutes under 10% of total resources" -- whose? DOD's or the whole Community's?
- The accuracy -- either in literal statement or in possible distortion -- of the full para (beginning "Two thirds...") troubles me.
- 10 Top para is awkwardly phrased and, as phrased, misleading. There is no question about these systems' usefulness to military commanders in the field. The questions focus on priorities -- whose needs take precedence, especially in crises: the national decisionmakers' or the field commander's.
- 10 "Another emerging challenge..." para, should frankly state "and how to keep intelligence from being drawn into partisan domestic political debate."
- 12 I seriously question the accuracy of the statement that "top policy makers ... were not aware that such activities were being conducted." We should not, cannot, endorse a statement on this central point which is sloppily worded or implies a degree of unauthorized free-wheeling (by CIA) which, in fact, never existed.
- 15 Statement of DIA and INR involvement in SALT, as it stands, is inaccurate.
- 17 Last sentence, top para: Point is not that analysts need to understand operational policy decisions; they need to know what actions (including statements made in private channels) the US Government has taken/is taking -- actions

- 18 Relationship between DCI's responsibilities for protecting sources and methods and the classification system (something quite different) is badly distorted.
- 23 Historical statement of why the USIB was established not accurate. It was developed, initially, to protect departmental equities not to assist the DCI. Rephrase - The USIB currently advises the DCI....
25. 40 Committee para: problem is more that decisions have been made by telephone vote than that they have been made by correspondence.
- (Les -- per our 9 Dec telephone conversation, the last sentence on this page (which refers implicitly to Robert Kennedy and John Mitchell) is accurate.)
- 29 What do they mean by reestablishment of the GAO role? Did the GAO ever previously have such a role?
- 35 Word "officer" should be added at end of 9th line (after "senior foreign intelligence").
- 44 Third line from bottom: "charge," not "change"
- 70 Statement about why covert operations originally placed in CIA wrong. They -- OPC -- put there because of flexibility of ~~102~~ of National Security Act of 1947.  
Section 102 (d) (5)
- 73 Last two lines -- is this statement about OMB true?
